### BENEFITS

- Oxygenates skin
- Helps to calm sensitive skin
- Helps to destroy bacteria and reduce breakouts
- Helps to purify and smooth skin
- Blend with any Gavée Gold or Salts Alive product to synergistically enhance the high-performing ingredients

### ABOUT GAVÉE GOLD'S PROPRIETARY INGREDIENT COMPLEX

All Gavée Gold products contain a proprietary blend of naturally derived, high performance, ultra-purified ingredients to rapidly rejuvenate the skin's appearance without adverse reactions.

### FEATURES

**24K Liquid Gold** – Metal-free and organically purified over 30 years, this elemental form of liquid gold acts as a powerful catalyst to increase the performance of all active ingredients that reduce roughness and inflammation, help slow collagen breakdown, firm the skin, and improve radiance.

**Cell Salts** – Bioavailable salts provide essential minerals often deficient in the skin. Cell salts help to soften and rejuvenate rough, damaged skin and leave a supple, healthy glow.

**Ozonated Omega Oils** – A combination of egg oil and hemp oil provides all three essential fatty acids—omegas 3, 6 and 9—and oxygenates skin with cosmetic-grade ozone. Helps destroy bacteria, soothes irritated skin, calms redness, and rejuvenates dull skin.

AVAILABLE IN 15ML, 30ML  
125ML, 250ML

## KEY INGREDIENTS

Golden Radiance O3 is made with proprietary elements, certified organic and key active ingredients.

**Activated Oxygen (O3)** - Known for its ability to decrease inflammation and irritation while purifying and rejuvenating dull and aging skin.

**Mongongo (Manketti Seed) Oil** - A natural sun protectant with powerful antioxidants and hydrating properties.

**Adansonia Digitata (Baobab) Oil** - High in omega fatty acids, this also contains vitamins A, D, E & F to help rejuvenate damaged skin and improve elasticity.

**Lavandula Angustifolia (Lavender) Oil** - Helps to slow aging with powerful antioxidants and is highly effective in helping to calm acne and various unhealthy skin conditions.

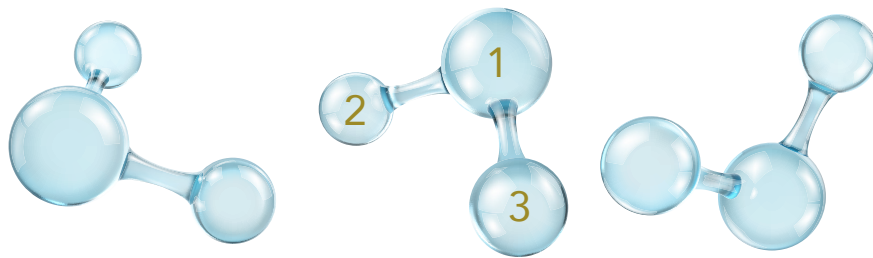

**Luteum Ovi Extract (Egg Oil)** - An excellent emollient with anti-bacterial and collagen-building properties. It is also well known to prevent and treat scarring.

---

## ACTIVATED OXYGEN (O3)

Activated oxygen (O3) one of nature's basic elements, is a powerful disinfecting and deodorizing gas comprised of oxygen (O2) with an extra oxygen atom attached that makes it O3, or ozone. The only by-product of ozone is oxygen. In fact, ozone reverts to oxygen quite rapidly and naturally.

In medicine, ozone therapy is used to disinfect and treat diseases by limiting the effects of bacteria, viruses, fungi, yeast, and protozoa.

---

## ADVANCED PROTOCOLS

**Golden Radiance O3** is a rich and highly concentrated blend of ozone-infused oils and fragrant essential oils. It provides an excellent way to purify, detoxify and rejuvenate the skin after aggressive lasers and peels.

- Mix a few drops with **Gold Citrus Cleanse** or **Cell Salt Cleanse** to create a gentle cream cleanser.
- Mix with **Golden Enzymes** to decrease sensitivity while reaping the benefits of glycolic acid (always test first).
- Mix with **Liquid Gold Peptides** to make a firming oil serum
- Mix with **Cell Salt Restore** conditioner to develop a deep conditioner
- Mix with **Cell Salt Enrich** lotion for a soothing, moisturizing and oxygenating massage lotion

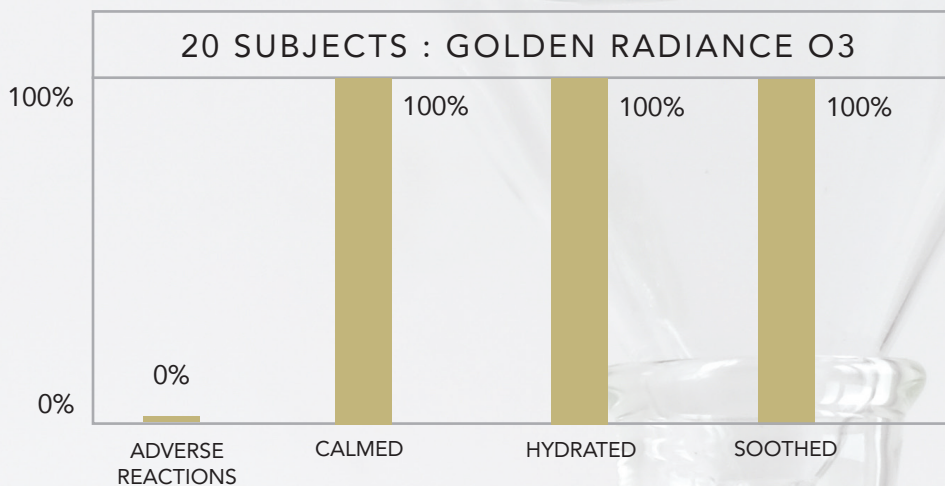

## CLINICAL RESULTS

Twenty subjects aged 35 to 70 were evaluated for deep tissue rejuvenation. They all had been treated using the Fotona 4D (deep laser resurfacing) followed by a single serum, **Golden Radiance O3**, to help soothe, hydrate and protect the skin during the rejuvenation period. All 20 subjects reported the Golden Radiance O3 helped to instantly calm, soothe and hydrate the red, irritated skin. Subjects also experienced marked improvement within a 24-hour period with little-to-no redness. Study Director Dr. Jin Lee.

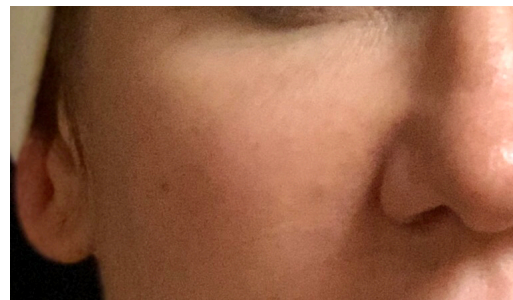

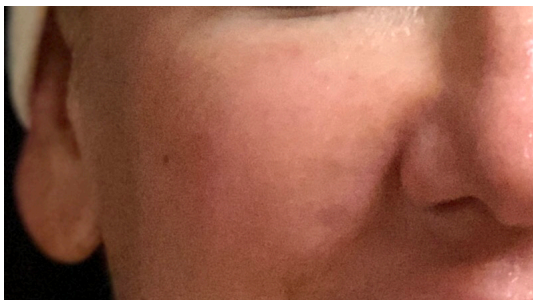

- 100% of subjects liked the way the skin serum felt on their skin and would continue to use it as a regular part of their daily skin care regimen.
- 100% of all subjects reported using **Golden Radiance O3** after aggressive laser resurfacing from the Fotona Laser showed marked improvement.

Within 24 hours after a deep laser resurfacing treatment using only the **Golden Radiance O3** Serum, 20 Subjects Reported:

This study demonstrated that a skin serum containing a proprietary mixture of Gold Oil, Cell Salts, and Ozonated Omega Oils, derived from therapeutic elements and antioxidant factors, is safe and effective for all skin types needing hydration and deep rejuvenation. **Golden Radiance O3**'s efficacy and excellent tolerability explain why all the subjects would continue regular use of the serum.

## VISIBLE RESULTS IN REJUVENATION

Subject exhibited calmed, soothed and hydrated skin within 24 hours after a deep laser resurfacing using only **Golden Radiance O3** Serum.

## APPLICATION AND USAGE

Use full strength or blend a few drops with any Gavée Gold or Salts Alive products. Please use only with Tiffany Andersen Brands.

*"After meeting Tiffany Andersen on the set of The Romance show, I promised her I would use the products for a week then give my feedback. I am an olive-skinned girl with freckles on my face, which as I've gotten older has created a more blotchy looking complexion. After daily use of the Gavée Gold Collection, I cannot believe how much more even my skin tone has become. My complexion has more of a youthful glow to it and I've noticed a small change in the tightening of my pores. I'm sold! - Stacy Michaels, Fitness Model*

Tiffany Andersen has been a top Las Vegas medical aesthetician and holistic health practitioner for more than twenty years. She discovered a jewel at the heart of skincare and developed the Gavée Gold Anti-Aging Skincare Collection (pronounced JAH-vay Gold). Tiffany's passion to create a safe and effective skincare line began after she survived two tragic life events: a traumatic car accident that nearly left her paralyzed, and stage IV cancer.

From this, she learned her body greatly struggled to filter toxins. With the support of Dr. Jin Lee, Tiffany began intensive research, working closely with a highly respected biochemist and clinical pharmacist to develop a toxin-free, high performing skincare line. Tiffany's newly discovered organic elements have been processed over long periods of time to naturally concentrate the vital nutrients.
