

DYNAMICALLY BLENDED

FOR OPTIMAL SKIN BARRIER FUNCTIONS

TRIPLE INFUSED STEM CELL ACTIVATORS

Aloe Vera Leaf Juice, Tocopherol (Vitamin E), Arnica Montana Flower Extract, Tetrahexyldecyl Ascorbate, Rosmarinus Officinalis Extract, Swertia Chirata Extract, Bellis Perennis

To protect against the appearance of wrinkles, skin laxity and discoloration issues, it's important to introduce antioxidants to the epidermis. These herbal therapies work together by neutralizing harmful free radicals that damage healthy skin and contribute to all signs of aging.

INTRACELLULAR MATRIX BUILDERS

Undaria Pinnatifida Extract (Brown) Algae, Sodium Hyaluronate (Hyaluronic Acid)

Restores the skin's matrix "glue" that holds epidermal layers together and helps restore skin's moisture barrier for a firmer, more youthful-looking glow. Protecting the skin's matrix is vital to a healthy skin barrier.

TIFFANY ANDERSEN, MLSO, AE, HHP

Tiffany has been custom blending formulas for over thirty years. Her passion for anti-aging stems from overcoming two catastrophic life events—a serious car accident that left her with severe paralyzation of her lymphatic system and Stage 4 cancer.

Awarded four consecutive years as a Product Innovator of the Year, Tiffany introduced first-to-market Cell Salts in a skin-barrier-friendly Clean Cosmeceutical™ base.

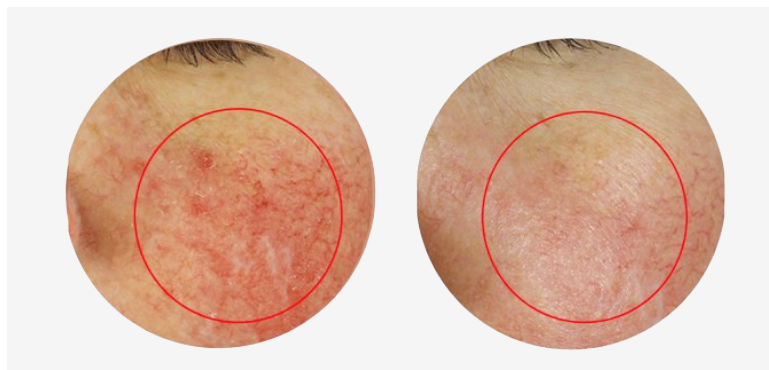

CLINICAL IMPROVEMENT

REDNESS + DISCOLORATION

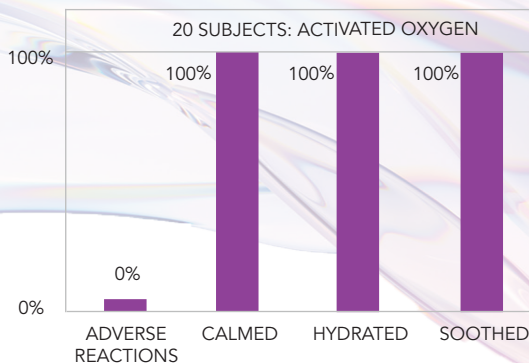

IMPROVEMENT IN THE APPEARANCE OF SKIN REDNESS

IMPROVEMENT IN THE APPEARANCE OF IRRITATION

Activated Oxygen helped to soothe, hydrate and dramatically reduce the appearance of red irritated skin for all 20 subjects. Study Director Dr. Jin Lee.

CERAMIDE REPAIR OZONATED OILS

Argan Oil, Babassu Seed Oil, Baobab Seed Oil, Rose Hip Oil, Evening Primrose Oil, Sea Buckthorn Fruit Oil, Castor Seed Oil, Hydrogenated Castor Oil, Emblica Officinalis (Amla) Oil

When the skin has a strong skin barrier, toxins, allergens and pathogens are unable to penetrate and epidermal lipids are retained in the skin.

CONTAINS 19 BOTANICAL ACTIVES

Activated Oxygen helped to soothe, hydrate and dramatically reduce the appearance of red irritated skin for all 20 subjects.

Activated Oxygen contains lipid repair factors (lipophilic) such as essential fatty acids (EFAs), possessing powerful anti-inflammatory properties which metabolize structural lipids vital for epidermal regenerative effects.

CLEAN COSMECEUTICALS™

EXPERIENCE A NEW KIND OF CLEAN

Unparalleled levels of powerful ceramide actives. No potentially harmful fillers to create "the effect." Clean Cosmeceuticals™ contain clean concentrations of clinically tested ingredients that achieve the desired result.

CERAMIDE REPAIR OZONATED OILS

A Detoxitini for the Skin™

Activated Oxygen is a highly concentrated ozonated ceramide oil formula. Ozone (O₃) converts to oxygen (O₂) when applied topically to act as an oxygen facial in a bottle. Ozone helps destroy bad bacteria and alleviate inflammatory conditions.

Ceramides are lipids (fatty molecules) with both hydrophilic (water-loving) and lipophilic (fat-loving) properties. Ceramides are the major lipids that help form and repair the skin barrier by retention of moisture within the epidermis.

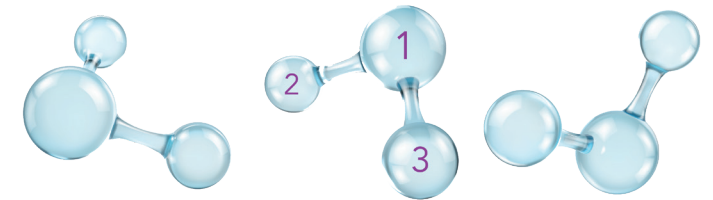

PROPRIETARY BLEND

USING OZONATED OILS

OZONE OILS

Ozone is the only by product of oxygen. In fact, ozone reverts to oxygen quite rapidly and naturally when applied onto the skin through ozone oil. In medicine, ozone therapy is used to disinfect and treat diseases by limiting the effects of bacteria, viruses, fungi, yeast and protozoa.

In the skin, ozone therapy has historically shown great results with antioxidant benefits and defending the epidermal barrier from free radical damage as well as stimulating fibroblasts to help increase the appearance of collagen and elastin.

Ozone therapy may stimulate the production of new blood vessels and increase oxygen to improve blood circulation and allow white blood cells to potentially eliminate opportunistic bacteria such as p. acnes bacteria or staphylococcus epidermidis.
